

- 1 Each square below contains a note value in 4/4 time. Search for a group of notes with a combined value of **8**. The notes must be in a straight line. They can be horizontal, vertical, or diagonal.
- 2 When notes with a combined value of **8** are located, use a colored pencil crayon to circle the group. A note can belong to more than one group. Each time you circle a group, make a tally mark at the bottom of the page. The game is over when you have made 23 tally marks. Feel free to keep going!
