

AN EYE FOR INTERVALS

- 1 Choose any pair of sunglasses. Name the notes in the lenses of your selected sunglasses. Determine if the two notes represent an interval of a 3rd, 4th, or 5th.
- 2 Next, color the sunglasses red if the two notes represent an interval of a 3rd, yellow if the two notes represent an interval of a 4th, or blue if the two notes represent an interval of a 5th.
- 3 Repeat Steps 1 - 2 for the remaining sunglasses.
